

BED BUG SOLUTIONS

Looking for the most effective solution for bed bug infestations? Look no further than Bayer.

Guidelines for a successful bed bug control program

→ **IDENTIFICATION**

Early detection is crucial for elimination.

→ **PREPARATION**

A thorough cleaning will make control efforts more effective.

→ **APPLICATION**

TREAT THE PERIMETER WALLS / VOIDS

Apply fast acting, long residual **TEMPO 1% DUST** to all the hard-to-reach areas, including cracks & crevices, electrical outlets, & beneath carpet edges along the tack strips. It's non-staining, low odor, and can stay active for up to a year.

TREAT THE BED AREA & FURNITURE

TEMPRID READY-TO-SPRAY &

TEMPRID FX can be safely applied to headboards, mattresses, box springs, nightstands, & the interior of bed frames. Apply to tufts, seams, folds, & edges. It provides the fastest kill speed of any liquid and provides up to 180 days of control on bed bug eggs, nymphs, and adults.

→ **PREVENTION & MONITORING**

Educate customers on how to prevent the spread of bed bugs in the future.
